

IMS

IMS has a passion for precision and strong belief in quality. High-precision technology requires a maximum focus on quality. We have worked continuously on developing our products further and improving the qualifications of our staff ever since our company was established in 1980. The technical competency we have accumulated as a result, paired with modern technology, enables us to implement high-end custom-built and needs-orientated solutions.

Key figures:

430 Employees worldwide
More than 4000 Measuring systems worldwide in use
at more than 690 Customers in more than 60 countries

Your benefits:

- Several measuring tasks -> one supplier
- One system -> several measuring tasks (multi gauge)
- Customized solutions
- Painless adaptation to your lines and systems
- Key components developed and manufactured by IMS
- Global spare part stocks and services

We offer:

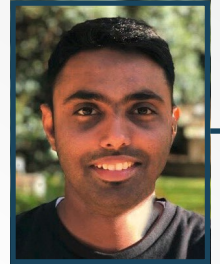

- High-precision, online measuring systems for industrial use in the steel and non-ferrous metal rolling industries

Topic of the speech:

- **2 Years of Cooperation Between BRS and IMS in Establishing a Fully Integrated Quality Data Management System Based on Online Surface Inspection from Casting to Finished Goods**

Speaker:

John Caleb Somasundaram
Quality Systems Developer
Big River Steel, USA

Speaker:

Thomas Köpsel
Sales / Product Manager
IMS Messsysteme GmbH, Germany
