

LECHLER

ENGINEERING YOUR SPAY SOLUTION for your plant and your machine is the objective of the Lechler experts globally. The German manufacturer of precision spray nozzles and nozzle systems for the Metallurgical Industry with production and engineering facilities in India, China, Hungary, England and the USA is offering plant life cycle support to operators of metallurgical plant and machinery.

Key figures:

107 Million Euros in revenue in 2018
700 employees worldwide in 6 plants

Your benefits:

- Increase of roll service life
- Reduction of maintenance costs
- Reduction of energy consumption
- Improvement of strip surface quality, shape and flatness

We offer:

- Competence in providing roll cooling and pickling line solutions with optimized nozzle and header arrangements
- Selectospray® Selective roll cooling systems for flatness control in cold rolling
- Competence in providing high pressure descaling solutions with optimized Scalemaster nozzle and header arrangements for hot rolling
- Total nozzle management concept

Topics of the speeches:

- Utilization of Energy Cost Saving Potentials at High Pressure Descaling
- Fundamentals and Advanced Roll Cooling Technologies

Speaker:

Jürgen Frick
Director Metallurgy

33 years of experience in the Metallurgical Industry, holds various patents, Board Member of several Lechler affiliates, Board Member of German Metallurgical Plant Builder Association VDMA

Speaker:

Ismael (Tito) Torres
Metallurgical Sales Manager

11 years experience in the steel and aluminum. Bachelor of Science in Electrical Engineering from Purdue University, Master of Science in Management of Information Systems from Benedictine University, and is currently finishing his Master's in Business Administration from Benedictine University.
