

REBS

For 70 years the REBS Zentralschmiertechnik GmbH has been convincing with experience and uncompromising product quality. The special areas include customer-oriented design and production of lubrication systems for the steel and aluminum industry, from small-scale to large-scale.

Thanks to its very intelligent solutions, REBS enjoys worldwide recognition both for final customers and for unit or rolling mills manufacturers. The company REBS Zentralschmiertechnik GmbH has established itself as a reliable partner to the industry with several 100 installed Air-Oil lubrication systems on rolling mills.

Key figures:

150 employees worldwide in 3 plants

Your benefits:

- Very short amortization time justifies your investment
- Significant increase in storage life
- Significant increase in unit uptime
- Reduction of maintenance due to maintenance and wear free components
- Drastic reduction of environmental pollution caused by lubricants

We offer:

- Customer-oriented solutions for rolling bearing lubrication in all rolling processes

Topic of the speech:

- Why switch to Air-Oil lubrication?

Speaker:

Saif Sheet

Application Specialist – Air-Oil lubrication
HASTECH REBS Inc.

REBS Zentralschmiertechnik specializes in Air-Oil lubrication systems for rolling mills. REBS Air-Oil systems will extend bearing life and allow for faster rolling speeds. Oil consumption is minimal, thus providing a safer and cleaner mill environment as well as improved process and product capabilities. With over 40 years of Air-Oil experience, REBS is the recognized industry leader with a comprehensive list of installations worldwide. REBS is represented in North America by HASTECH REBS Inc.
