Rolling in Memphis: Cold and Hot Rolling Day 2019

Chicago, June 18, 2019 – Heavy-hitters from the steel industry will host an event dedicated to the latest advancements in cold and hot steel rolling technology at the Hilton Hotel Memphis on 25 – 26 September 2019. Hosting organizations include Atlantic, Fraunhofer IZFP, Gontermann-Peipers, Herkules, IMS Messsysteme, Lechler, Lismar, Quaker, REBS, Schaeffler, and Steinhoff.

Cold and Hot Rolling Day events take place annually, and have been hosted in major urban centers across the globe, including Düsseldorf, Moscow, Beijing, and Izmir. This year's edition will be the first of its kind to take place in North America. The bustling city of Memphis, Tennessee provides an attractive backdrop for this much-anticipated gathering of engineers, researchers, and roll shop operators from around the world.

Experts in the field, representing firms and academic institutions alike, will present cutting-edge findings and showcase the newest developments in steel rolling technology. Leading researchers from the Fraunhofer Institute IZFP, for example, will share their findings in the field of nondestructive monitoring technologies for industry-relevant product lifecycles during their presentation, entitled: Nondestructive Testing Technologies for the Cold- and Hot-Rolling Industry. The complete presentation program can be found on the Cold and Hot Rolling Day website.

Participation in Cold and Hot Rolling Day 2019 is free of charge. Registration is now open, and can be completed via the event's official website: www.rolling-day.com
